

The **Community Engagement Team** focuses on improving health outcomes by removing social barriers. This is accomplished by focusing on Social Determinants of Health, which are social and economic factors that can affect a person's health. Together with social service agencies, the team creates and expands innovative community-based equitable programs.

The **Community Relations Team** works directly with WellCare members. They help them get the most from their WellCare benefits so they can achieve their health goals. Community organizations benefit through our trainings, presentations, and educational materials. They're proud to sponsor, create, and attend events that supply resources to WellCare members and their communities.
